

Short-Term Care

Short-Term Care is a service offered in our Extended Care Facility (ECF) to respond to the needs of patients who require several additional days of recovery time after being discharged from any hospital.

Short-Term Care is a form of “extending” care for medical and surgical patients. The patient’s physician may have decided that the patient can be discharged from hospital care, but the patient may still need rehabilitation services to recover more fully, or to be ready to care for themselves at home.

Long-Term Care

For many older adults, there comes the time when their needs can best be met by residing in our Extended Care Facility – the next best place to home. Residents are encouraged to bring some of their favorite furniture; pictures; and of course, family photos.

Payment For Services

The Extended Care Facility accepts virtually all payers including Medicare, Medicaid, commercial insurance, industrial, or self-payment. Ongoing billings are processed on a monthly basis.

Visiting Hours

Your family and friends are encouraged to visit often and attend special activities with you.

More Information

Our staff would be glad to show you our Extended Care Facility and/or answer your additional questions. Please visit or call us today:

Extended Care Facility

*What Is So
Special About The
Extended
Care Facility?*

What Makes The Extended Care Facility Special?

Your Physician

We provide ready and convenient access for your attending physician. We are located within Morrow County Hospital, which enables you to have all your health-care needs met without leaving the building (i.e., radiology, lab, emergency and outpatient procedures, and consultation).

A physician is also available in our emergency department, which is just down the hall from ECF.

Your Nurse

All patients and residents of ECF receive direct care and supervision by a team of licensed professional nurses, who are on duty 24-hours a day. The experience and stability of our registered nurses (RNs), licensed practical nurses (LPNs) and state-tested nursing assistants (STNAs) provide our patients and residents with the specialized care they need.

Your Therapist

Physical and occupational therapists provide services on a full-time basis. Patients recuperating from fractured hip surgery, joint replacement and strokes have easy access to our on-unit therapy department and its services enhancing the patient's recovery. In addition, speech and respiratory therapy are also available.
